Projects

MEDIDATA | IOT HACKATHON | LEARNING
· Designed a website using ReactJS, NodeJS that could monitor the patients' vitals and alert the doctors
· This project focuses to solve the latency issues to address each patient.
· We were able to connect doctors locally to an access point using Raspberry Pi 8GB RAM, ESP32WROVER and sensors such as Max30102, Dht 11 and SpO2.
· Successfully designed an IoT based solution that was fast and cost effective.

CODECRAFTERS DSA ROADMAP | VUE JS | GITHUB
· Created a website that has all major topics of Data Structures with important questions for each topic.
· It has a progress bar that progresses as you complete each question.
· Built entirely on Vue Js.

RECIPE RECOMMENDATION SYSTEM | VUE JS | GITHUB
· Created a website that can recommend recipes to its users.
· The website has a beautiful UI created with ReactJS, and includes a landing page, featured menu section, an add-to-cart section, meal exploration & customization, admin panel for editing the menu, user account creation, adding to cart, and an integrated database using MySQL
· Built on ReactJS and MySQL.

DSA | LEETCODE, PYTHON | GITHUB
· A repository that has the problems I solve on Leetcode majorly in Python.

SHOPPING APP | JAVA | GITHUB
